SpeechWork Comments

Add an audio track to any photo on the phone and submit

Media to the cloud

FFmpeg generates movie from input files (wav, jpg).
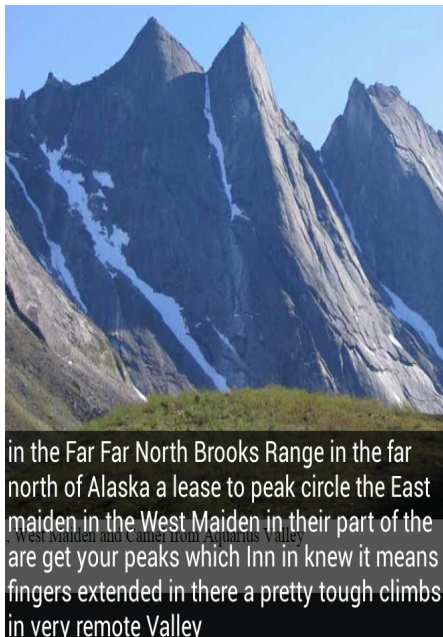

Pictures with text overlay for storytelling

Extract text strings from the audio track

speech-to-text

Output is a Media file bundle on the cloud that can be shared with social media or with other local apps making use of special media like the text overlay you see on the pic on the left.

in the Far Far North Brooks Range in the far north of Alaska a lease to peak circle the East maiden in the West Maiden in their part of the , West Maiden and Camel from Aquarius Valley are get your peaks which Inn in knew it means fingers extended in there a pretty tough climbs in very remote Valley
